Summary of Report

The target is a fishing / trawler vessel w/ several boom-like projections. Its condition is unkept & damaged. The bridge / cabin area has several odd angles associated with the front of it. It appears to produce an overly large amount of exhaust / smoke while running. There are nets or something woven hung "out in the wind" but are not being ^{currently} used for intended purpose. The vessel is not fishing. It is towing something behind it that is rectangle in shape & slopes down from front to rear. It is associated with c/s [REDACTED] and the U/I S/V. The target is acting as a "look out" or "early warning system" for the [REDACTED] operation. Impression that either the target or U/I S/V will fake becoming hung up on the bottom (or a reef) & the other vessel will come to help. This play will be used in order for the two vessels to meet. ~~The~~ The target & U/I S/V will then take a parallel course to each other after the meeting. Additional information: The name / term "Baptista" is important to the target vessel (former name?). The activity of the target has something to do / revolves around the area near the life ring on the starboard side of the deck at the rear of the cabin / bridge area. There is an access to the forward hold area under the bridge / cabin. This forward hold area is mostly empty at the present time. There are objects w/i this area that have to do w/ "holding out" from the sides. (over)

[Is RR associated]
w/ S/V?

yes

[How?]

sally Express that RR is
going to fake getting hung up
on the reef/bottom; S/V
will come to help. ~~either~~
~~S/V~~ ~~the two~~

Either one or the other will
play one part, the other vessel PT
the other.
God damn it
to hell.
Shit!!!

Play used to meet;
The two on parallel
course after the meeting.
